Additional Comments

FEATURES:
 Individually pocketed coil spring suspension with elastic webbing & polyester fibre.

- This means pocket springs are individually housed in their own fabric pockets which allows them to work independently
- Good choice if 2 users of same sofa vary considerably in weight
- Was introduced in the mattress industry years ago but now is popular in furniture as a more "advanced" seating

Pocket springs only react to the pressure & weight which is applied directly to each one giving great support & maintaining shape of cushion.
